

William's Update

Remittances

William Clinton Co

August 12, 2025

Abstract

This paper examines the current environment of remittance measurement, identifying key literature and data sources while also addressing topics discussed during William and Michael's meeting on July 24, 2025.

Table of contents

1	Introduction	2
2	Best Dataset: World Bank	2

4.3	Low Relevance	8
4.3.1	International Migration, Remittances, and Household Investment: Evidence from Philippine Migrants' Exchange Rate Shocks	8
5	Appendix	8

1 Introduction

Remittance datasets are generally limited in scope and quality. This report presents the best available datasets and summarizes key literature on remittance measurement. Most research focuses on the effects of remittances rather than forecasting flows. There are two main types of datasets: cost of remittances (detailed, corridor-level) and actual remittance flows (often less accurate and updated infrequently). The World Bank provides the primary source for both, with most other datasets derived from their data. Remitscope is also worth mentioning as a potential dataset, given its completeness. More details can be found in the [Remitscope section](#).

2 Best Dataset: World Bank

2.1 Cost of Remittances Dataset

This is a more comprehensive dataset. Please see the [sample dataset](#) where we can observe source and destination countries.

We can also observe the firm, payment instrument (bank transfer, cash, etc.), and speed.

There are many different methodologies with regards to remittances. For an overview, please see the [World Bank's resources page](#).

The World Bank aims to establish unified standards and maintain public data availability. See [certified national and regional databases](#). There are issues with their data request site; I have submitted several requests without receiving instructions. The dataset should be available at: [World Bank Remittance Prices Dataset](#).

2.2 Remittances Sent Dataset

The following fields are available:

-
- ☐ Average transaction cost of sending remittances from a specific country (%)
 - ☐ Average transaction cost of sending remittances to a specific country (%)
 - ☒ Personal remittances, paid (current US\$)
 - ☐ Personal remittances, received (% of GDP)
 - ☐ Personal remittances, received (current US\$)

Figure 1: Available Fields for Remittances Sent Dataset

Bilateral remittance flows are not directly observable; only aggregate data is available. The corridor-level dataset is released infrequently. According to the literature:

Additionally, the World Bank also publishes estimates on bilateral remittance flows. The basis for bilateral remittances estimates are weighted migrant stock data, the weighted income of migrants based on the per capita income in the country of destination, and the weighted income in the origin country of the migrant (Ratha and Shaw, 2007: 43).

The main dataset is available at: [World Bank Development Indicators - Personal Remittances](#). See limitations at the [metadata page](#).

Because direct measurement (tracking actual transactions) is often incomplete, they use a mix of methods: direct reporting when possible and estimates/models to fill in gaps.

2.2.1 Derivative Datasets

1. [Migration Data Portal](#)
2. [UNCTAD Statistics - US Remittances](#)
3. [Migration Policy Institute - Global Remittances Guide](#)
 - [Total Remittance Inflows and Outflows \(1980-Present\)](#)
 - [Remittance Trends Over Time](#)
 - [Bilateral Remittance Flows](#)
4. [World Bank - Personal Remittances Received](#)
5. [Asian Development Bank - Remittances Data](#)

2.3 Remitscope

Consider [RemitScope](#) as an additional resource. See the [guide](#) for usage. RemitScope aggregates data from various sources, including bilateral flows, but these are not always easily accessible.

RemitSCOPE brings together data from secondary sources, that are usually scattered in different organisations and agencies, as well as collecting data through primary research and directly from market operators and regulators.

Currently, RemitScope covers Africa and Latin America. Asia is coming soon.

Africa	Latin America	Asia
Region overview	Region overview	Release coming soon
Themes	Themes	
Indexes	Indexes	
Country Profiles	Country Profiles	
Remittance Market Insights	Remittance Market Insights	

Figure 2: RemitScope Regional Coverage

See the [RemitSCOPE Thematic Dashboards Overview](#):

	Indicator Name	Source * - RemitSCOPE calculations based on source	Dashboard	Country Profile
Remittance Flows	World Bank remittance inflows / outflows	WB Remittance annual inflow / outflow data (latest)	Remittances - Inflows / Outflows + Country	x
	Remittance inflows growth rate (World Bank)	WB Remittance annual inflow / outflow data (latest)	Remittances - Inflows / Outflows + Country	x
	Remittance inflows / outflows as a % of GDP	WB Remittance annual inflow / outflow data (latest)	Remittances - Inflows / Outflows + Country	x
	Population's dependence on remittances	Afrobarometer survey 2018 (and other sources)	Remittances - Inflows + Country	
	Informal remittance inflows estimate	RemitSCOPE compiled from multiple sources / varying years	Remittances - Inflows + Country	
	Estimated remittance inflows / outflows	World Bank Bilateral Remittance Matrix (estimates) 2021	Remittances - Inflows / Outflows + Corridor	x
	Central Bank remittance inflows / outflows	RemitSCOPE compiled from multiple Central Banks - annualised	Remittances - Inflows / Outflows + Country & Corridor	x

Figure 3: RemitSCOPE Dataset Overview

RemitScope provides visualization tools; data scraping may be required for analysis.

Figure 4: RemitScope Example Visualization

Explore more at [RemitScope Latin America Themes](#).

2.4 Canadian International Development Platform: CIDP

The [CIDP Remittances Explorer](#) uses World Bank datasets to create interactive remittance data visualizations. The dataset is available for download from the project repository: [CIDP Remittances Data](#).

2.5 Additional Data Sources

- [SDGs Today Remittances Dataset](#) - Sustainable Development Goals tracking platform for remittance data

2.6 Data Request Status

2.7 World Bank

I have submitted a data request through the [World Bank's data download portal](#) for the most current and comprehensive remittance datasets.

Wise rejected my request:

Figure 5: Wise Data Request Rejection

3 Wise & Remitly

I contacted Remitly and Wise to request data access. Wise denied our request.

4 Literature Review

4.1 High Relevance

4.1.1 Country/Region Case Studies

4.1.1.1 [The Propensity to Remit: Macro and Micro Factors Driving Remittances to Central America and the Caribbean](#)

Authors: Hussein Bidawi, Paola Aliperti F. Domingues, Chiara Fratto, Nicole Laframboise
Publication Date: 2022

Comment: Promising paper with corridor-level data for Latin American countries.

4.1.1.2 [Macroeconomic Determinants of Remittance Flows to Sub-Saharan Africa](#)

Authors: Deodat E. Adenutsi, Christian R. K. Ahortor
Publication Date: 2021

Comment: Focuses on Sub-Saharan Africa.

4.1.1.3 [Determinants and Macroeconomic Impact of Remittances in Sub-Saharan Africa](#)

Authors: Raju J Singh, Kyung-woo Lee, Markus Haacker
Publication Date: 2009

Comment: IMF paper, slightly older.

4.1.1.4 [Determinants of Remittances: Evidence From Tonga](#)

Author: Huidan Lin
Publication Date: 2011

Comment: Focuses on Tonga.

4.1.1.5 [Macroeconomic Determinants of Remittances: Evidence from India](#)

Author: Poonam Gupta
Publication Date: 2005
Comment: Relevant but dated.

4.1.2 Defying the Odds: Remittances Held Up During the COVID-19 Pandemic

Working Paper: [IMF Working Paper](#)
Authors: Saad Quayyum, Kangni Kpodar, Montfort Mlachila, Vigninou Gammadigbe
Publication Date: 2021
Comment: Uses COVID-19 as a “shock” to analyze remittances.

4.1.3 Remittances and Vulnerability in Developing Countries: Results from a New Dataset on Remittances from Italy

Authors: Andrea Presbitero, Nikola Spatafora, Giulia Bettin
Publication Date: 2014
Comment: Focuses on Italy.

4.1.4 What Explains Remittance Fees? Panel Evidence

Authors: Thorsten Beck, Mathilde Janfils, Kangni R Kpodar
Publication Date: 2022
Comment: IMF paper on remittance fees.

4.1.5 Monetary Policy and Remittance Flows in Latin America and the Caribbean

Publication Date: 2022
Comment: Examines monetary policy and remittance flows in Latin America and the Caribbean.

4.2 Medium Relevance

4.2.1 Determinants of International Remittance Inflow in Asia-Pacific Middle-Income Countries

Authors: Naoyuki Yoshino, Farhad Taghizadeh-Hesary, Miyu Otsuka
Publication Date: 2020
Comment: Directly relevant, but not as academically reputable as high relevance papers.

4.2.2 Migrant Remittances

Author: Dean Yang
Publication Date: 2011
Comment: Highly regarded, but a bit old.

4.2.3 Are Remittances Insurance? Evidence from Rainfall Shocks in the Philippines

Authors: Dean Yang, HwaJung Choi
Publication Date: 2007
Comment: Uses rainfall shocks to analyze remittance determinants.

4.2.4 [Remittance Behaviours Among Recent Immigrants in Canada](#)

Publication Date: 2011

Comment: Statistics Canada paper on remittance behaviour in Canada.

4.2.5 [Migrant Remittances: Alternative Money Transfer Channels](#)

Authors: Martina Metzger, Tim Riedler, Jennifer Pédussel Wu

Publication Date: 2019

Comment: Explores remittance transfer channels.

4.2.6 [Migration and Remittances during the Global Financial Crisis and Beyond](#)

Editors: Dilip Ratha, Jeffrey H. Cohen, Ibrahim Sirkeci

Publication Date: 2012

Comment: World Bank book, somewhat dated.

4.3 Low Relevance

4.3.1 [International Migration, Remittances, and Household Investment: Evidence from Philippine Migrants' Exchange Rate Shocks](#)

Author: Dean Yang

Publication Date: 2006

Comment: Relevant but old; analyzes currency appreciation as a determinant of remittances.

5 Appendix
